Art. Rolf SCHOCK, ON THE NATURE OF THE TIME

In my paper "On the nature of time" (this journal, n° 101, 1983, pages 51-70), the first sentence is the erroneous joke "What is the time?". This error was corrected but ignored. The title was also garbled to "On the nature of the time" on the cover and on every other page. Also, all corrections and improvements made on a second proof were forgotten.

I must now forego some strengthenings of the axioms for temporal order which were made on the second proof. The main correction to be made is the grammatical one of omitting "the" before "time" in the titles and in the first sentence. Additional corrections are the following few.

page	lines	correction
52	11	put ",and similarly for yox and wov." for ".".
55	12 from bottom	put "aPp" for "not pPa".
59	2 from bottom	put "when pC'p'" for "when pCp'"
61	9	put "non-empty" between "the" and "set".
	17	add "Also, In p E Tm p for any natural process p." after the period.

62 1 put "of" between "explications" and "absolute".
9 from bottom put "than" for "thab".
70 7 add "Factually based assumptions of process
existence can extend this weak kind of completeness."
after the period.
