

TABLE DES MATIÈRES

BART VAN KERKHOVE & JEAN PAUL VAN BENDEGEM, Editorial Preface	231
MARY LENG, Mathematical Practice as a Guide to Ontology: Evaluating Quinean Platonism by its Consequences for Theory Choice	235
LIEVEN DECOCK, A Lakatosian Approach to the Quine-Maddy Debate	249
ALAN BAKER, Maximizing Principles and Mathematical Methodology	269
SANDY BERKOVSKI, Surprising user-friendliness	283
ERIK WEBER & LIZA VERHOEVEN, Explanatory Proofs in Mathematics	299
IAN DOVE, Can Pictures Prove?	309
IULIAN D. TOADER, Mathematical Diagrams in Practice: an Evolutionary Account	341
BART VAN KERKHOVE & ERIK MYIN, Direct Perception in Mathematics: A Case for Epistemological Priority	357
DON FALLIS, What Do Mathematicians Want? Probabilistic Proofs and the Epistemic Goals of Mathematicians	373
AARON LERCHER, What is the Goal of Proof?	389
DON FALLIS, Response to “What is the Goal of Proof?”	397
RON ROOD, Proof, cognition, and rationality	399
ROMAN MURAWSKI, Leibniz’s and Kant’s Philosophical Ideas and the Development of Hilbert’s Programme	421
